ACHIEVEMENTS:

Grand Finalist VHackathon USM 2024
Top 15 for an International Hackathon with over 250+ teams, 800+ participants

Gold in Individual Category PPKOMP 2023, 2024
Gold and 2nd in Team Category. University Representative for problem solving coding competition with over 100 contestant from different local universities

Champion Coding Matriculation Level
First place in a coding competition with over 500 students in my module

Badminton & E-Sport Awards
Top 2 in Singles District Level Badminton for 2 years. 2nd in Mobile Legend for matriculation level

PROJECTS:

Univary

An Educational Platform that links Gmeet, Microsoft teams, Zoom and the universities website for students. Mostly made the framework and UI design for users to easily access their desired online class/meetings/webinars

Indoor Navigation System

Using Djikstra* Algorithm on a universal website, students can navigate my faculty easier. By experimenting with Flask and Django on which framework is better, Flask became the main framework I used to support my website for my faculty. An initial use of PHP and Python was also experimented for easier work load on the repetition codes used in JS.

AI Furniture Detector

Using Image Processing, AI will find similar furniture on google for easier live feed furniture shopping

---

CO-CORRICULUM:

College, Faculty and Course Representative

Made events for students, became the representative for problems, benchmarking and also the image of the organization

University Media Club

The news outlet and graphic designer for poster, videos and media for university events
